The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04) Application/Control Number: 10/651,676

Art Unit: 1771

1. Claims 1-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 7-31 of copending Application No. 10/366,051. Although the conflicting claims are not identical, they are not patentably distinct from each other because each discloses a two layer structure for use in absorbent articles comprising permeable layers wherein the layers are in contact with each other and wherein one of the layers comprises a plurality of projecting macrofeatures.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

2. Claims 2 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2 and 7 the claimed structure is not clear because it is not clear what is meant by "an area defined within each of said plurality of macrofeatures".

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Thomas, U.S. Patent No. 6,242,074. Thomas discloses an apertured polymeric film

having a planar surface and plurality of protuberances extending from the planar surface bonded to a fibrous material such as a nonwoven web or loose fibers which are applied to the film and which contact all or a portion of the film. The points at which the fibrous material extends over the apertures would correspond to the claimed areas within the macrofeatures where the first layer is not in contact with the second layer. See abstract, figure 4A, col. 3, lines 1-46. The film comprises a plurality of protuberances which correspond to the claimed first and second macrofeatures and they can be arranged in a pattern, (see 6, lines 17 – 43). The material of Thomas may be used as the topsheet for an absorbent article such as a diaper.
